

CHILDHOOD ASTHMA AND SECONDHAND SMOKE

7,000

number of
chemicals in
secondhand
smoke

40

percentage
of children,
living with smokers,
who visit the ER
for asthma

400,000

number of NJ
children
exposed to
secondhand
smoke at
home

Breathing in secondhand smoke can trigger more frequent and severe asthma attacks.

The chemicals in secondhand smoke are dangerous for unborn babies, infants, children and their growing lungs and bodies.

Protect your children.
Keep your car and home
smoke-free!

Quitting smoking is the
best way to reduce your
child's risk of an asthma
attack!
